SEBAS RODRIGUEZ

SOFTWARE DEVELOPER

With over a year of development experience, I have worked on projects using technologies such as HTML, JavaScript, PHP, CSS, React, Laravel and Node. I also have experience in requirements analysis and data-driven decision making, which allows me to function effectively as an analyst. Proficient in Scrum methodology, strong analytical skills and ability to work in a team environment.

EDUCATION

SENA
- Analysis and Development of Information Systems.
- CyberSide project.
  - Team leader in the creation of a mobile-enabled inventory control web application under Scrum methodology. Proficient in delegating strategic tasks for optimised development of monolithic systems. Eager to leverage leadership skills in dynamic technology roles.

Platzi
- Full Stack Developer with Javascript
  - I became a competent Full Stack developer through this course specialising in JavaScript, React, Node, Express, Git and Github. I mastered key technologies and confidently landed my first job in the exciting field of development. I elevated my skills with a practical and up-to-date approach to cutting-edge technologies.

EXPERIENCE

App Web ALBA - SENA (7 month)
- I analysed and systematised the beer tasting process at SENA, improving decision making by creating a systematic approach to beer tasting procedures, ensuring consistency and accuracy in evaluations. I used PHP, Laravel, JavaScript, jQuery, HTML, CSS and MySQL under a microservices architecture, improving efficiency and data management.

SATIC Web (4 month)
- Designed and developed SATIC's website, combining creativity and UX/UI design principles. I contributed to the design and implementation of key modules in the control panel, improving user experience and system efficiency. I used typescript under Next.js with a focus on microservices to achieve optimal results in the development of responsive and cross-browser compatible web applications.

Nostalhit Music Group, LLC - Web (4 month)
- I managed and developed the website for Nostalhit Music Group, LLC, using Next.js with a focus on web services and object-oriented programming. Implemented efficient version control using GIT, ensuring code integrity and facilitating collaboration within the development team.

COURSES AND MASTERCLASS

Micrososft
- Introduction to Data Analytics.

Platzi
- Frontend developer
- Full Stack Developer with Javascript
