EDUCATION

SENA
- Analysis and Development of Information Systems.

- CyberSide project.
  - Spearheaded a team in crafting a mobile-responsive inventory control web app. Proficient in strategic task delegation for streamlined monolithic system development. Eager to leverage leadership skills in dynamic tech roles.

Platzi
• Full Stack Developer with Javascript
  - I became a proficient Full Stack developer through this specialized course in JavaScript, Node, and React. I mastered key technologies, confidently securing my first job in the exciting field of development. I elevated my skills with a practical and up-to-date focus on cutting-edge technologies.

EXPERIENCE

Developed ALBA Web App
- Revamped beer tasting procedures with a streamlined PHP, JS, jQuery, and SQL solution for enhanced decision-making. Integral in crafting ALBA, a robust, database-driven system, ensuring top-tier performance and reliability in IT processes.

SATIC - WEBSITE
- Crafted SATIC's landing page, blending creativity with technical prowess. Contributed to key module design and implementation in the dashboard, enhancing user experience and system efficiency. Utilized Next.js with a focus on microservices for optimal results.

Project development manager
- As the Project Manager at Nostalhit, a leading music distributor, I strategically lead development projects, ensuring the team's efficient execution. Committed to achieving the company's music industry objectives, I drive perfection through meticulous planning and optimization, contributing to Nostalhit's ongoing success.

COURSES AND MASTERCLASS

Micrososft
- Introduction to data analyst

Platzi
- Frontend Developer
- React.js
